Coalition for Silver Lake Members:

Subject: Modular Office Space at Silver Lake Reservoir Complex

This letter is in response to your May 10 letter regarding the modular office space planned at Silver Lake Reservoir Complex (SLRC). Thank you for taking the time to share your concerns with us. The opportunity to address your concerns and share information about the operational needs that make this space necessary is appreciated.

Over the years, the Los Angeles Department of Water and Power (LADWP) has provided a significant amount of space for public access and passive recreational uses at SLRC, including the meadow area, Armstrong Pathway, Tesla Walkway, Silver Lake Dam Walkway and the soon-to-be-completed Ivanhoe Pathway. Once Silver Lake and Ivanhoe Reservoirs were taken out of service, LADWP carefully considered the portions of the SLRC needed for its current and future operations. It was then that LADWP announced it would make the remaining portions available for public use. Recognizing the importance of public participation in planning the future of this public space at SLRC, LADWP agreed to fund a Master Plan at a cost of \$2.9 million.

Throughout these efforts moving forward with the Master Plan process, LADWP has continuously communicated the importance of SLRC as an existing operational facility. SLRC currently serves as a reporting location to multiple LADWP work groups and is also used as a meeting host site. LADWP now needs to increase the number of staff positions that will report to the site in order to meet current and future operational responsibilities throughout our customer service area, some of which include work on projects in the Silver Lake area. In fact, LADWP is currently working on a number of projects at the site to ensure the future water quality of Ivanhoe and Silver Lake Reservoirs, as well as the use of storm water runoff to help maintain the water level in these reservoirs. Additionally as an operational facility, LADWP will also retain the ongoing responsibility for the dams which require monitoring and reporting to the California Department of Safety of Dams. LADWP does not anticipate the need for any additional office buildings at SLRC beyond the currently planned modular offices.

In consideration of our neighbors and in consultation with the City Council offices, LADWP has included design elements such as paint color and landscaping in modular offices and parking area that will blend with the surrounding areas. Additionally, the trailer will be located in the northeast section of the property near the other existing buildings on the property.

LADWP appreciates you keeping an open line of communication with us and appreciates the open dialogue throughout this evolution. In response to your most recent request, we are happy to accommodate the placement of additional benches, doggie bag dispenser, and native landscaping by the Ivanhoe walking path. As a neighbor and community partner, LADWP agrees to this request now instead of waiting for the Master Plan process to address these additional features.

SLRC plays an important and integral role in both the Los Angeles water operations as it does in the community, providing public uses as well as supporting important water system initiatives to benefit all LADWP customers. LADWP looks forward to continue being good neighbors to the Silver Lake community, while providing reliable and safe drinking water to all of Los Angeles.

Sincerely,

Richard F. Harasick  
Senior Assistant General Manager – Water System
